[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

I am a passionate Front-end Developer with bachelors in Information Technology and recently graduated in Web design and development. I like to build interactive UI layouts, building websites and apps that are responsive and usable with my skills in development.

Skills

Frameworks/Libraries	• React • Express • Bootstrap • Angular • Tailwind
Languages	• JavaScript ES6 • jQuery • HTML • CSS
Database	• MySQL • PostgreSQL • MongoDB
Design Tools	• Adobe XD
Collaboration	• Slack
Versioning	• GitHub

Education

Web design and development | Conestoga College, Kitchener, Canada **Sep 2019 to Dec 2020**

Bachelor's in Information Technology | M. H. Saboo Siddik College of Engineering,
Mumbai, India **June 2012 to Aug 2017**

Projects

Movie DB ([See live](#))

MovieDB is an online platform showing information related to films. It uses TMDB API to fetch latest information about your favorite movies. It helps you search different movies, get in-detail information about films and also lets you watch movie trailers. I have created this project using React and hosted it on Netlify. While implanting the project I learned important concepts like debouncing and learned Bootstrap UI framework.

[React, HTML, CSS, Bootstrap, JavaScript, TMDB API]

Listicle Board ([See live](#))

Listicle Board is a platform where you can manage your to-do items as well as have common list of to-dos by inviting your friends into your group. While creating this project I learned concepts like JWT authentication, sending mails with SMTP and creating API with Express.

[React, HTML, CSS, Bootstrap, JavaScript, Express, PostgreSQL]

Portfolio ([See live](#))

A website to demonstrate my skills and projects with their live links. I have used framer motion for animation. The website is also compatible for mobile and tablet.

[React, HTML, CSS, Tailwind, JavaScript, Framer Motion]
